1. **Executive Summary**

The Risk Triangulation Engine (RTE) is an AI-powered financial intelligence platform that ingests multiple regulatory and financial documents from Indian businesses — ITR (Income Tax Return), GST returns (GSTR-1, GSTR-3B, GSTR-2B), MCA filings, and bank statements — and performs automated cross-source analysis to produce a unified, auditable risk signal for credit underwriting decisions.

The product addresses a fundamental gap in Indian MSME and mid-market lending: each financial document tells a partial story, and lenders who evaluate documents in isolation miss systemic patterns of misrepresentation, related-party opacity, and cash flow manipulation. RTE solves this by triangulating across all four sources simultaneously, surfacing contradictions that no single document would reveal.

Problem Statement: Indian credit underwriters evaluate ITR, GST, MCA, and bank statements in isolation — a fragmented approach that allows material misrepresentations to go undetected. A company may declare ₹4.12 Cr PAT in ITR while its bank statement reveals ₹0 in vendor payments, or claim zero related-party transactions in AS-18 while BSA shows ₹3.77 Cr received from the holding company. RTE detects these contradictions automatically.

Product Vision: To become the definitive pre-sanction intelligence layer for fintech lenders and NBFCs in India — delivering forensic-grade risk analysis in hours, not days.

	Analysis type: Analyse GST returns Period of assessment : Same as Bank statement period (Always take of 1 year even if bank statement is less than a year)

2. **Product Scope & Boundaries**

2.1 In Scope

- Automated ingestion and parsing of ITR-6 / ITR-4 / ITR-3/ITR-5 (PDF format from Income Tax Portal). **This will be ingested through vendor api. (Single year)**
  (Input will be PDF/Credentials)
- Automated ingestion of GSTR-3B (filed returns PDF) and GSTR-2B (portal Excel export) for up to 36 months. **This will be ingested through vendor api. (Single year)**
  (Input will be credentials/JSON)
- Automated ingestion of MCA filings: AOC-4 (financial statements), MGT-7 (annual return), charge documents, director data. **This will be ingested through vendor api.**
  (Input will be CIN)
- Automated ingestion of bank statements.(standalone risk signals from each document). These documents will be fetched via AA or API. These can include scanned statements/e-statements.
  -Single Statement
  -Multi Statement
  -Single Account
  -Multi Account
  (Input will be bank statements)
- Cross-document triangulation: 52 risk signals across Integrity, Compliance, Credit Behaviour, and Business Risk categories
- Automated CAM (Credit Assessment Memo) generation with structured output

2.2 Out of Scope (v1.0)

- **Credit bureau integration (CIBIL, Experian) — v2.0 roadmap**
- **Financial Statement extraction and risk analysis - v2.0 roadmap**
- Multi year ITR trend analysis
- Multi year MCA trend analysis
- Multi year GST trend analysis
- Sector-specific risk models (manufacturing, pharma, agri) — v1.5
- Personal credit assessment (individual borrowers) — separate product line.

3. **Target Users & Personas**

Persona	Role	Primary Need	Pain Point Solved
Credit Underwriter	Reviews loan applications for NBFCs / banks	Validate borrower financials quickly and reliably	Manually cross-checking 4 documents takes 2–3 days; RTE does it in minutes
Credit Risk Analyst	Builds risk models and sets underwriting policies	Identify systemic fraud patterns across portfolio	Inconsistencies like AS-18 zero vs BSA ₹3.77 Cr RP transfers are invisible without triangulation

4. **Analysis Modules & Feature Specifications**

The RTE consists of four interconnected analysis modules. Each module produces standalone findings that feed into the final Triangulation Engine.

4.1. Document Ingestion and Parsing

The JSON response received as output for scope 1 documents needs to be parsed before undergoing extraction.

4.2. Analysis and Storage

The specific parameters defined for each document (reference: https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account **) need to be extracted, deviations calculated and stored on each level.**

Scenario specific example:

For XYZ company, we are considering performing risk triangulation across the following data

-ITR

-GST

-MCA filing

-Bank Statements

We take one primary signal - Revenue

ITR Revenue- 2Cr

GST Revenue - 1.5Cr

MCA Revenue - 3.5Cr

Bank Statements - 95 lakhs

Deviation across parameters for signal in consideration

-ITR vs GST

-ITR vs MCA

-ITR vs Bank Statements

-GST vs MCA

-GST vs Bank Statements

-MCA vs Bank Statements

The parameters to be stored

-Case Name

-Assessment Period - Will be same across documents, if not take the most recent period of the document

-Industry - MCA/ITR

-Business Activity - MCA/ITR

-Revenue values across documents

-Deviation values across documents

4.3. AI Inference and Triangulation

There are 6 sheets in **(reference:** https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account **)** where AI Inference comes into picture

-Overall Summary

-Financial Analysis

-ITR Analysis

-MCA Analysis

-Major Suppliers and Customers

-Triangulation

-Macro Factors

All AI summary is generated based on underlying financial ratios and values specific to the document.
In Triangulation sheet the AI Inference will be based on cross document analysis

Overall Flow Inference:

RTE — CAM Service Architecture Flow

4.4. CAM Report Generation

The AI inference output for each stage/sheet will be passed as a JSON response which needs to be mapped to each corresponding sheet in the defined section before creating the overall CAM report (XLSX/PDF)

5.Output Deliverables

RTE produces a structured Credit Assessment Memo (CAM) comprising 15 standardised sections. The CAM is the primary output consumed by underwriters. (The order of sheet arrangement is as per https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account **)**

CAM Section	Contents
Company Information	Legal name, CIN, PAN, GSTIN, incorporation date, status, industry, address, business description, website

Director Details	Current and past directors with DIN, appointment dates, cessation dates, key risk flags, other directorships and associated charges
Open Charges & Sequence	All MCA-registered charges with holder, date, amount, property secured, and latest event
Financial Analysis	Balance sheet summary, P&L summary, financial ratios — all with YoY comparison, inference, and source citation
Network Overview	Netscan (Out of scope 1)
Peer Benchmarking	MCA
GST Returns	GSTR-1 vs GSTR-3B vs GSTR-2A reconciliation; business breakup by supply type; ITC summary
Major Suppliers & Customers	Top 10 suppliers and top 10 customers by taxable value with invoice counts

ITR Analysis	Line-by-line ITR extraction with underwriter notes; risk assessment metrics summary
MCA Analysis	13 MCA-specific risk parameters with observed values, rationale, and source
Triangulation	26-row cross-source comparison across 7 financial categories; ITR vs GST vs BSA vs MCA for each parameter
Court and AML	CrimeCheck - Out of scope 1
Labour Stats	EPFO - Out of scope 1
Bank Statement CAM (Comprises of 4 separate sheets)	Account details, consolidated monthly CAM (credits/debits/balances), fraud signals, irregular transactions detail
Risk Signals Summary	52 risk checks with pass/fail status, risk category, and source document; overall grade and segment-level breakdown

6.User Experience Requirements

6.1 Case Creation & Document Upload

- Single case creation form: borrower name, PAN, GSTIN, loan purpose, requested amount
- Drag-and-drop multi-file upload with format validation (PDF, XLSX, JSON accepted)
- Document type auto-detection: system identifies ITR vs GST vs BSA vs MCA from content
- Upload progress tracking with per-file status indicators
- Duplicate file warning: alert if same document period already uploaded for this case

6.2 Analysis Dashboard

- Real-time processing status with estimated completion time
- Segment-level risk breakdown: Integrity / Compliance / Credit Behaviour / Business Risk with individual scores
- One-click drill-down from any flag to source document evidence

6.3 CAM Viewer

- Interactive CAM with collapsible sections and in-page search
- Side-by-side triangulation view: show all four sources for any financial parameter on a single screen
- Underwriter annotation: ability to add notes to any flag (accepted risk, explanation received, pre-condition set)
- Flag override: senior underwriter can override any flag with mandatory reasoning — logged immutably
- Export options: full CAM as Excel (structured), PDF (formatted), JSON (API)

6.4 Notification & Workflow

- Email notification/Webhook when analysis is complete with risk grade summary
- Escalation routing: cases above 0.50 risk grade automatically routed to senior underwriter queue
- Pre-condition checklist: automatically generate list of documents/explanations required based on flags raised

7.Risk Signal Catalogue (54 Checks)

Below is the complete risk signal registry. Each signal is categorised, described, and mapped to its source data. This data

7.1 Integrity Signals (24 checks)

#	Signal	Detection Logic	Source
1	Criminal cases — Primary Firm (Phase 2)	Active severe criminal cases against the entity	Criminal Records DB
2	Criminal cases — Subsidiary (Phase 2)	Active cases against majority-owned subsidiaries	Criminal Records DB
3	Criminal cases — Directors (Phase 2)	Active cases against current directors or promoters	Criminal Records DB
4	Criminal cases — Network(Phase 2)	Cases against immediate network companies	Criminal Records DB

5	Suspected Shell Company (Phase 2)	No real economic activity; matches shell company patterns	MCA + GST
6	Suspected Shell Network (Phase 2)	Promoter DIN linked to 2+ shell companies	MCA Directorships
7	Blacklists / Sanctions (Phase 2)	Listed on any government-released blacklist	Regulatory DBs
8	Web-presence Authenticity	Website non-compliant with declared MCC Risk Level = ‘High’ if detected from webscan api response.	Web Scan
9	Adverse Media (Phase 2)	Negative mentions in digital publications	Media Scan

10	Document Tampering	Tampering of bank statements/ Balance Recon Failure detected.	BSA
11	Balance Manipulation	Current logic on pass through behaviour to be implemented. -Amounts above >=1L credited -debited in 0-2 day window (>=80% amount) ● >= 3 source transactions displaying this pattern	BSA
12	Suspicious Cash Transactions	Current logic on pass through behaviour to be implemented Checks if cash credit transactions on the same	BSA

		day collectively exceeds ₹50000	
13	Suspicious Digital Transactions	Out-of-limit digital transaction activity (RTGS/UPI) Checks if RTGS Transactions are < INR 200000 Checks if UPI Transactions exceed daily limit of INR 100000	BSA
14	BSA Inconsistencies	Balance reconciliation fails at >2 transactions	BSA
15	Suspected Capital Rotation	Same counterparty on both credit and debit side	BSA

		(Your top creditor is your top debitor)	
16	GST Under Cancellation / Suspension (Phase 2)	GSTIN flagged for compliance issues	GST + BSA
17	Legal Name Mismatch	ITR/MCA legal name ≠ bank account holder name	BSA + GST
18	Insider Transaction Alert	Fund transfers to promoter-linked accounts detected The director detected from MCA is detected as a receiver in the bank statement narration.	BSA + ITR/MCA
19	Vendor Overlap Alert	Top supplier also appears as top buyer (circular sales) Related to vendor	GST + BSA

		authenticity triangulation signal being detected (GST value is fetched after criteria is confirmed)	
20	Related Party Transactions	RP transactions in BSA not declared in ITR schedule under borrowings Related to related party triangulation signal being detected	ITR + BSA
21	Undisclosed Capital Inflows	Non-trade BSA credits not reconcilable to any source declared in ITR (Directors/Promoters)	ITR + BSA
22	Missing Auditor Fee	No BSA debit matching declared audit fee amount and auditor name declared in ITR.	ITR + BSA

23	Director Exits	> 30% director churn in last 12 months	MCA
24	Name Mismatch	If any mismatch detected between company name across any document with Bank Statement. ITR/MCA/GST - BSA	Added Document Sources

7.2 Compliance Signals (5 checks)

#	Signal	Detection Logic	Source
24	E-Invoice Non-Compliance (Phase 2)	E-invoice mandate applicable but not followed	GST
25	EPFO Non-Compliance (Phase 2)	Missed EPFO filings in past 3 months	EPFO

26	GST Non-Active Status (Phase 2)	GSTIN status is inactive or surrendered	GST
27	Address Mismatch Alert	GST address vs bank account address discrepancy	BSA + GST
28	Non Compliant Directors	Check if director(s) DIN is active and compliant. STATUS = ‘SUSPENDED’	MCA

7.3 Credit Behaviour Signals (4 checks)

#	Signal	Detection Logic	Source
29	Irregular EMI Transactions	Current logic on BSA to be implemented EMI Transactions that don't happen on the same day of	BSA

		every month	
30	EMI Bounce	Current logic on BSA to be implemented Bounce/Return Transactions associated with the EMI Obligation	BSA
31	Inward Cheque Bounce	Current logic on BSA to be implemented Checks for inward cheque bounces category detected in the statement	BSA
32	Outward Cheque Bounce	Current logic on BSA to be implemented Checks for outward cheque bounces category in the statement	BSA

7.4 Business Risk Signals (20 checks)

#	Signal	Detection Logic	Source
33	Labour Count Change (Phase 2)	EPFO headcount change > 30% in 3 months (use current headcount logic implemented for employer risk check)	EPFO
34	GST ITC Risk (phase 2 deliverable)	ITC from vendors with suspended GST or chronic late filing	GST
35	Industry Mismatch (phase 2 deliverable)	Vendor purchases atypical for declared business category	GST

36	Stock Clearing (phase 2 deliverable)	Manufacturing entity selling without procuring for 3+ months	BSA + GST
37	Sales Reversal	Credit notes > 5% of gross sales value in period	GST
38	DSCR Below Benchmark (phase 2 deliverable)	Debt Service Coverage Ratio below 1.25x	BSA
39	Revenue Reconciliation Gap	Revenue in 1+ documents deviates > 20% from others (any one) ITR-BSA >20% ITR-MCA > 20% BSA-MCA > 20%	ITR + BSA +MCA

40	Payroll Expense Gaps	Employee expense in 1+ documents deviates > 20% from others (any one) ITR-BSA >20% ITR-MCA > 20% BSA-MCA > 20%	ITR + BSA +MCA
41	Informal Borrowings	EMI-like outflows to non-financial institutions for 2+ months (Probable emi) This becomes a trigger when borrowings not declared in ITR-MCA but emi's flow detected in BSA.	ITR + BSA+MCA
42	ITC Concentration Risk (Phase 2 deliverable)	Single related-party vendor > 60% of total ITC	GST

43	B2C Sales Anomaly	top buyer for B2B entity is from a consumer rather than a company	GST
44	Time-Barred ITC (Sec 16(4)) (Phase 2 deliverable)	Ineligible ITC appearing in 3+ consecutive months	GST
45	Opaque Vendor Billing	Mechanically identical invoice value from unidentifiable vendor. If the vendor detected in GST (supplier/buyer), the name is not of a company/llp but of an individual Check: if name not ending with pvt.limited,llp etc.	GST

46	RCM Liability Surge	Reverse charge on imports growing > 100% in 4 months Overview → Business breakup → Purchases → Reverse charge	GST
47	Account Dormancy	Account inactive > 30% of statement period Check if dormant days > 30% of statement period	BSA
48	Utility Expense Missing	Electricity/fuel missing in BSA or > 50% below ITR declared	ITR + BSA
49	NWC Intensity Rising (Phase 2)	Working capital requirement growing faster than revenue	MCA + ITR

50	Subpar Revenue growth	Revenue growth of company lower than 5% or more than benchmark for the industry	MCA Fillings
51	Subpar ROE	ROE for the company is 10% or more lower than industry benchmark	MCA Fillings
52	Adverse Macro-factors	Macro commentary on industry is negative	IDfy Services

7.5 Account Conduct Signals (3 checks)

#	Signal	Detection Logic	Source
53	Negative Balance Detected	Account balance goes negative at any point in period	BSA

54	Unexpected Late Influx	Large unexplained credit in last 15 days of statement	BSA

8.Integrations & Data Sources

Integration	Data Type	Use in RTE	v1.0 Scope
Income Tax Portal	ITR PDF / XML	Revenue, expenses, tax, related parties	Vendor API - pass credentials
GST Portal	GSTR-3B PDF, GSTR-2B XLSX	Revenue, ITC, vendor data, compliance	Vendor API - pass credentials
Bank Statement PDF/JSON	E-statement/Scanned	Cash flows, fraud signals, CAM	Manual upload/API/AA
EPFO Establishment Data	Headcount, challan history	Payroll validation, employee count	Employer Name given as input during bank statement analysis

Criminal Records DB	FIR, court, tribunal records	Director / entity criminal background	API (IDfy)
MCA Filings	Company financials and details	Compliance and liquidity health check	Vendor API - Pass CIN and Company Name
Financial Statements	P & L, BS	Financial Ratios and Auditor Notes	v2.0 roadmap
Credit Bureau (CIBIL/Experian)	Credit history, CMR rating	Existing debt obligations	v2.0 roadmap

8. Glossary

Term	Definition
GSTR-3B	Monthly GST return filed by a registered taxpayer declaring outward supplies, ITC, and tax payments

GSTR-2B	Auto-generated input tax credit statement for the buyer, based on supplier GSTR-1 filings
GSTR-1	Monthly/quarterly return filed by a supplier declaring outward supplies (invoices issued)
ITR	Income Tax Return form for companies other than those claiming exemption under Section 11
AOC-4	MCA form for filing financial statements (balance sheet, P&L, cash flow) with the Registrar of Companies
ITC	Input Tax Credit — GST paid on inputs, deductible against output tax liability
RCM	Reverse Charge Mechanism — GST payable by the recipient, not the supplier (applies to certain services like imports)
AS-18	Accounting Standard 18 — Related Party Disclosures (mandatory for companies filing with MCA)

DPO	Days Payable Outstanding — average number of days a company takes to pay its vendors
DSO	Days Sales Outstanding — average number of days to collect payment after a sale is made
DSCR	Debt Service Coverage Ratio — EBITDA / (Interest + Principal) — measures ability to service debt
CAM	Credit Assessment Memo — structured document summarising all financial and risk analysis for a credit decision
BSA	Bank Statement Analysis — systematic review and categorisation of bank transactions
NPA	Non-Performing Asset — loan where principal or interest is overdue by 90+ days
Section 16(4)	Provision of CGST Act that bars ITC on invoices not filed within the statutory time limit

Rule 37A (GST)	Requires reversal of ITC if vendor has not paid corresponding tax within 180 days of invoice
Triangulation	Cross-validation of the same financial parameter (e.g., revenue) across ITR, GST, MCA, and BSA to detect inconsistencies

9.Appendix B: Developer Reference — API Response Field Mapping

This appendix provides the definitive field-level mapping for every data parameter populated in the Risk Triangulation CAM report. Each parameter is traced to its exact source: the API response document, the specific sheet, and the field name or row identifier (Sl. No. where applicable). Developers must use these references to implement parsers that correctly read each value from the structured API outputs.

Certain CAM fields will be present in just ITR/MCA/GST, if that check is not chosen by the user that field will not be populated.

(All this data need not be populated in CAM Excel as values (referenced by https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account), but they need to be extracted and passed to the AI Orchestration layer to create concise credit risk inference and AI Summary.

B.1 Company Information — Data Source Mapping

(For ITR - 5 MCA details will be unavailable, so the CAM fields needs to be scraped from ITR)

If for any case user does not choose MCA in triangulation, from the existing services chosen company details will be populated

CAM Field	Source Document → Sheet	Field / Sl. No. in Source
Legal Name (ITR and MCA available)	MCA Probe → About the Company	Column: LEGAL NAME
CIN (ITR and MCA available)	MCA Probe → About the Company	Column: CIN/LLPIN
PAN (ITR and MCA available)	MCA Probe → About the Company	Column: PAN
Date of Incorporation	MCA Probe → About the Company	Column: DATE OF INCORPORATION
Company Status	MCA Probe → About the Company	Column: STATUS / ACTIVE COMPLIANCE

Type of Entity (ITR and MCA available)	MCA Probe → About the Company	Column: CORPORATE TYPE (e.g. Private Limited Non-Government)
Listing Status	MCA Probe → About the Company	Column: LISTED (Y/N) / Listing information
Date of Last AGM	MCA Probe → About the Company	Column: DATE OF LAST AGM
Industry / Category	MCA Probe → About the Company	Columns: INDUSTRY, BROAD INDUSTRY CATEGORY
Business Activity	MCA Probe → Annexure - Financial Params	Row: Business Activity Code, % of Turnover
Business Description	MCA Probe → About the Company	Columns: DESCRIPTION OF MAIN BUSINESS

Registered Address (ITR and MCA available)	MCA Probe → About the Company	Column: REGISTERED ADDRESS
Business Address	MCA Probe → About the Company	Column: BUSINESS ADDRESS
Website	MCA Probe → About the Company	Column: WEBSITE(S)
Email	MCA Probe → About the Company	Column: EMAIL(S)
Bank Accounts	ITR → General Information	Section: Information of all Bank Accounts — Account Number, Bank Name, IFS Code
Authorised Capital	MCA Probe → About the Company	Column: AUTHORISED CAPITAL (Crore)

Paid-Up Capital	MCA Probe → About the Company	Column: PAID UP CAPITAL (Crore)
Promoter Shareholding	MCA Probe → Shareholding More Than 5%	Category: PROMOTERS — Share Holder, Shareholding %, Amount
Public Shareholding	MCA Probe → Shareholding More Than 5%	Category: Share Holder, Shareholding %
Sum of Open Charges	MCA Probe → About the Company	Column: SUM OF CHARGES
GSTIN Details	MCA Probe → Annexure - GST	Columns: GSTIN, GSTIN STATUS, DATE OF REGISTRATION, Centre/State Jurisdiction, Return filings

GSTIN (cross-ref)	ITR → General Information	Section: GST Gross Receipt — GSTIN, Annual Value
MSME Payment Events	MCA Probe → MSME Supplier Payment Delays	All rows: Supplier Name, PAN, Total Amount Due, Period
Related Party Transactions	MCA Probe → About the Company	Row: AS-18 Gross value of Related Party transactions
Corporate Highlights / Events	MCA Probe → About the Company	Section: Highlights / Recent Events

B.2 Director Details — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Sl. No. in Source

Director Name	MCA Probe → Directors	Column: DIRECTOR NAME
DIN	MCA Probe → Directors	Column: DIN
DIN (cross-ref)	ITR → General Information	Section: Details of Directors — DIN
Designation	MCA Probe → Directors	Column: PRESENT DESIGNATION
Status (Active / Disqualified)	MCA Probe → Directors	Column: STATUS
Appointment Date	MCA Probe → Directors	Column: APPOINTMENT DATE
Cessation Date	MCA Probe → Directors	Column: CESSATION DATE

Date of Birth	MCA Probe → Directors	Column: DATE OF BIRTH
Nationality	MCA Probe → Directors	Column: NATIONALITY
Association History	MCA Probe → Director - Association History	All rows: DIN, company associations, appointment/cessation dates
Other Directorships	MCA Probe → Other Directorships	Columns: Corporate Name, CIN, Corporate Type, Date of Incorporation, Sum Of Charges, Cessation Date
Key Risk Flag (Disq. / Charge)	MCA Probe → Directors	Column: STATUS (Disqualified); cross-ref Open Charges Sequence — HOLDER NAME

Director Designation (ITR)	ITR → General Information	Section: Details of Directors — Name, Designation

B.3 Open Charges & Sequence — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Sl. No. in Source
Charge ID / Serial No.	MCA Probe → Open Charges Sequence	Column: CHARGE ID / SERIAL NUMBER
Status	MCA Probe → Open Charges Sequence	Column: STATUS (Open / Closed)
Filing Date	MCA Probe → Open Charges Sequence	Column: FILING DATE

Charge Holder Name	MCA Probe → Open Charges Sequence	Column: HOLDER NAME
Charge Amount	MCA Probe → Open Charges Sequence	Column: CHARGE AMOUNT
Property Type	MCA Probe → Open Charges Sequence	Column: PROPERTY TYPE
Property Particulars	MCA Probe → Open Charges Sequence	Column: PROPERTY PARTICULARS
Rate of Interest	MCA Probe → Open Charges Sequence	Column: RATE OF INTEREST
Number of Holders	MCA Probe → Open Charges Sequence	Columns: NUMBER OF HOLDERS, JOINT HOLDING, CONSORTIUM HOLDING

Latest Event Type	MCA Probe → Latest Event on Open Charges	Column: Event Type (Creation / Modification / Satisfaction)
Latest Event Date	MCA Probe → Latest Event on Open Charges	Column: Event Date
Sum of Open Charges (total)	MCA Probe → About the Company	Column: SUM OF CHARGES (aggregate)

B.4 Financial Analysis — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Sl. No. in Source
Share Capital	ITR → Balance Sheet	Sl. 1 — Share Capital; MCA Probe → Standalone Financial Data — Share Capital

Reserves and Surplus	ITR → Balance Sheet	Sl. 2 — Reserves and Surplus; MCA Probe → Standalone Financial Data — Reserves and Surplus
Shareholders' Funds (Net Worth)	ITR → Balance Sheet	Sl. 5 — Total Shareholders' Funds; MCA Probe → Standalone Financial Data — Total Equity
LT Borrowings (Bonds)	ITR → Balance Sheet	Sl. 7 — Bonds / Debentures
LT Borrowings (Term Loans)	ITR → Balance Sheet	Sl. 8 — Term Loans; MCA Probe → Standalone Financial Data — LT Borrowings
ST Loans Repayable on Demand	ITR → Balance Sheet	Sl. 20 — Loans Repayable on Demand; MCA Probe → Standalone Financial

		Data — Short Term Borrowings
Trade Payables (>6 months)	ITR → Balance Sheet	Sl. 14 — Trade Payables exceeding six months
Trade Payables (<6 months)	ITR → Balance Sheet	Sl. 25 — Trade Payables within six months
Trade Payables (total)	MCA Probe → Standalone Financial Data	Row: Trade Payables (sum of >6M + <6M)
Total Current Liabilities	ITR → Balance Sheet	Sl. 29 — Total Current Liabilities; MCA Probe → Standalone Financial Data
Net Fixed Assets	ITR → Balance Sheet	Sl. 39 — Net Fixed Assets (Gross Block minus Depreciation); MCA Probe → Standalone Financial Data — Net Fixed Assets

Trade Receivables (>6 months)	ITR → Balance Sheet	Sl. 41 — Trade Receivables exceeding six months
Trade Receivables (<6 months)	ITR → Balance Sheet	Sl. 48 — Trade Receivables within six months
Trade Receivables (total)	MCA Probe → Standalone Financial Data	Row: Trade Receivables (sum of >6M + <6M)
Cash and Cash Equivalents	ITR → Balance Sheet	Sl. 49 — Cash and Cash Equivalents; MCA Probe → Standalone Financial Data — Cash and Bank Balances
Other Current Assets	ITR → Balance Sheet	Sl. 52 — Other Current Assets

Total Current Assets	ITR → Balance Sheet	Sl. 53 — Total Current Assets; MCA Probe → Standalone Financial Data
Total Assets	ITR → Balance Sheet	Sl. 54 — Total Assets; MCA Probe → Standalone Financial Data
Revenue from Operations	ITR → Profit And Loss Statement	Sl. 5 — Revenue from Operations; MCA Probe → Standalone Financial Data — Net Revenue
Other Income	ITR → Profit And Loss Statement	Sl. 27 — Total Other Income
Employee Benefit Expenses	ITR → Profit And Loss Statement	Sl. 17 — Employee Benefit Expenses; MCA Probe → Standalone Financial Data — Employee Benefit Expense

Power and Fuel	ITR → Profit And Loss Statement	Sl. 16 — Power and Fuel
Other Expenses	ITR → Profit And Loss Statement	Sl. 20 — Other Expenses; MCA Probe → Standalone Financial Data — Other Expenses
EBITDA	ITR → Profit And Loss Statement	Sl. 22 — EBITDA; MCA Probe → Standalone Financial Data — EBITDA / Operating Profit
Depreciation	ITR → Profit And Loss Statement	Sl. 23 — Depreciation and Amortisation
EBIT	ITR → Profit And Loss Statement	Sl. 24 — EBIT
Finance Cost	ITR → Profit And Loss Statement	Sl. 25 — Finance Cost; MCA Probe → Standalone

		Financial Data — Finance Costs
Profit Before Tax	ITR → Profit And Loss Statement	Sl. 29 — Profit Before Tax; MCA Probe → Standalone Financial Data
Income Tax (Current)	ITR → Profit And Loss Statement	Sl. 30 — Current Tax; MCA Probe → Standalone Financial Data — Income Tax
Profit After Tax	ITR → Profit And Loss Statement	Sl. 32 — Profit After Tax; MCA Probe → Standalone Financial Data — Net Income
Current Ratio	ITR → Ratio Analysis	Row: Current Ratio; MCA Probe → Standalone Financial Data — RATIOS — Current Ratio

Quick Ratio	ITR → Ratio Analysis	Row: Quick Ratio; MCA Probe → Standalone Financial Data — RATIOS — Quick Ratio
Cash Ratio	ITR → Ratio Analysis	Row: Cash Ratio
DSO (Debtor Days)	ITR → Ratio Analysis	Row: Trade Receivables Turnover (in days); MCA Probe → Standalone Financial Data — RATIOS — Debtors/Sales Days
DPO (Creditor Days)	ITR → Ratio Analysis	Row: Trade Payables Turnover (in days); MCA Probe → Standalone Financial Data — RATIOS — Payables/Sales Days
EBITDA Margin	ITR → Ratio Analysis	Row: EBITDA Margin; MCA Probe → Standalone

		Financial Data — RATIOS — EBITDA Margin
Net Profit Margin	ITR → Ratio Analysis	Row: Net Profit Margin; MCA Probe → Standalone Financial Data — RATIOS — Net Margin
Return on Equity (ROE)	ITR → Ratio Analysis	Row: Return on Equity; MCA Probe → Standalone Financial Data — RATIOS — ROE
Return on Capital Employed	ITR → Ratio Analysis	Row: Return on Capital Employed
Interest Coverage Ratio	ITR → Ratio Analysis	Row: Interest Coverage Ratio
Debt / Equity Ratio	MCA Probe → Standalone Financial Data	RATIOS — Debt/Equity

Sales Growth (YoY)	ITR → Ratio Analysis	Row: Sales Growth
PAT Growth (YoY)	ITR → Ratio Analysis	Row: Profit After Tax Growth
Peer EBITDA Margin	MCA Probe → Peer Comparison	Column: EBITDA Margin (%) — Median of peer set
Peer Revenue Growth	MCA Probe → Peer Comparison	Column: Revenue (YoY growth) — Median
Peer ROE	MCA Probe → Peer Comparison	Column: Return on Equity (%) — Median
Peer Current Ratio	MCA Probe → Peer Comparison	Column: Current Ratio — Median
Peer D/E Ratio	MCA Probe → Peer Comparison	Column: Debt/Equity — Median

Forex Expense	MCA Probe → Annexure - Financial Params	Row: Expense in foreign currency
Forex Income	MCA Probe → Annexure - Financial Params	Row: Income in foreign currency
Overdue Trade Receivables	ITR → Balance Sheet	Sl. 41 — Trade Receivables >6M; MCA Probe → Auditors' Comments-Standalone — trade receivables exceeding six months; Annexure - Financial Params — Trade receivables exceeding six months
Related Party LT Loans	ITR → Balance Sheet	Sl. 9 — LT Liabilities from Related Parties + Sl. 21 — ST Liabilities from Related Parties

B.5 ITR Analysis — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Sl. No. in Source
Total Revenue from Operations	ITR → Profit And Loss Statement	Sl. 5 — Revenue from Operations
Total Other Income	ITR → Profit And Loss Statement	Sl. 27 — Total Other Income
Revenue from Services	ITR → Profit And Loss Statement	Sl. 2 — Sale of Services
Opening Inventories	ITR → Profit And Loss Statement	Sl. 6 — Opening Inventories
Closing Inventories	ITR → Profit And Loss Statement	Sl. 7 — Closing Inventories

Purchases (Raw Material)	ITR → Profit And Loss Statement	Sl. 8 — Purchases of Stock / Raw Material
Gross Profit	ITR → Profit And Loss Statement	Sl. 13 — Gross Profit
Power and Fuel	ITR → Profit And Loss Statement	Sl. 16 — Power and Fuel
Employee Benefit Expenses	ITR → Profit And Loss Statement	Sl. 17 — Employee Benefit Expenses
Selling / Admin / Other Exp	ITR → Profit And Loss Statement	Sl. 18 — Selling, General and Admin Expenses; Sl. 20 — Other Expenses
EBITDA	ITR → Profit And Loss Statement	Sl. 22 — EBITDA

Depreciation	ITR → Profit And Loss Statement	Sl. 23 — Depreciation and Amortisation
EBIT	ITR → Profit And Loss Statement	Sl. 24 — EBIT
Finance Cost	ITR → Profit And Loss Statement	Sl. 25 — Finance Cost
Profit Before Tax	ITR → Profit And Loss Statement	Sl. 29 — Profit Before Tax
Current Tax	ITR → Profit And Loss Statement	Sl. 30 — Current Tax
Deferred Tax	ITR → Profit And Loss Statement	Sl. 31 — Deferred Tax
Profit After Tax	ITR → Profit And Loss Statement	Sl. 32 — Profit After Tax (PAT)

Total Non-Current Assets	ITR → Balance Sheet	Sl. 45 — Total Non-Current Assets
Total Current Assets	ITR → Balance Sheet	Sl. 53 — Total Current Assets
Inventories	ITR → Balance Sheet	Sl. 47 — Inventories
Trade Receivables (>6M)	ITR → Balance Sheet	Sl. 41 — Trade Receivables exceeding six months
Trade Receivables (<6M)	ITR → Balance Sheet	Sl. 48 — Trade Receivables within six months
Trade Payables (>6M)	ITR → Balance Sheet	Sl. 14 — Trade Payables exceeding six months

Trade Payables (<6M)	ITR → Balance Sheet	Sl. 25 — Trade Payables within six months
Cash and Cash Equivalents	ITR → Balance Sheet	Sl. 49 — Cash and Cash Equivalents
Loan from Related Party (LT)	ITR → Balance Sheet	Sl. 9 — LT Liabilities from Related Parties
Loan from Related Party (ST)	ITR → Balance Sheet	Sl. 21 — ST Liabilities from Related Parties
Deferred Tax Liabilities	ITR → Balance Sheet	Sl. 15 — Deferred Tax Liabilities
Net Worth	ITR → Balance Sheet	Sl. 55 — Net Worth
Current Ratio	ITR → Ratio Analysis	Row: Current Ratio

Quick Ratio	ITR → Ratio Analysis	Row: Quick Ratio = (Current Assets – Inventories) / Current Liabilities (Appendix-1 Sl. No. 3)
Cash Ratio	ITR → Ratio Analysis	Row: Cash Ratio
Net Working Capital / Total Assets	ITR → Ratio Analysis	Row: Net Working Capital to Total Assets
DSO (Debtor Days)	ITR → Ratio Analysis	Row: Trade Receivables Turnover (in days)
DPO (Creditor Days)	ITR → Ratio Analysis	Row: Trade Payables Turnover (in days)
Cash Conversion Cycle	ITR → Ratio Analysis	Row: Cash Conversion (in days)

EBITDA Margin	ITR → Ratio Analysis	Row: EBITDA Margin
Net Profit Margin	ITR → Ratio Analysis	Row: Net Profit Margin
Return on Equity	ITR → Ratio Analysis	Row: Return on Equity
Return on Capital Employed	ITR → Ratio Analysis	Row: Return on Capital Employed (Appendix-1 Sl. No. 19)
Interest Coverage Ratio	ITR → Ratio Analysis	Row: Interest Coverage Ratio = EBIT / Finance Cost (Appendix-1 Sl. No. 20)
Sales Growth (YoY)	ITR → Ratio Analysis	Row: Sales Growth
PAT Growth (YoY)	ITR → Ratio Analysis	Row: Profit After Tax Growth

ITR Filing Type	ITR → General Information	Row: ITR Type
Assessment Year	ITR → Tax Details	Row: Assessment Year
Total Income	ITR → Tax Calculation	Row: Total Income
Tax Payable	ITR → Tax Calculation	Row: Tax Payable / Net Tax Payable

B.6 MCA Analysis — Data Source Mapping

(This sheet is going to be populated entirely by AI, only the fields are to be passed to AI by parsing)

CAM Field	Source Document → Sheet	Field / Sl. No. in Source

Charges Oustanding	MCA Probe → Open Charges Sequence	Column: HOLDER NAME — identify bank / NBFC / ARC holders; cross-ref Status = Open
Asset Stripping Risk	MCA Probe → Open Charges Sequence	Column: CHARGE AMOUNT (aggregate open charges); cross-ref MCA Probe → Standalone Financial Data — Total Assets for asset-coverage ratio
Auditor Repudiation / Qualification	MCA Probe → Auditors' Comments-Standalone	Column: Whether Report Qualified/Adverse; Comments Given By
Legal Attachment Risk	MCA Probe → Legal History	Columns: Case No., Case Type, Case Status, Date of Last Order/Activity, Description, Petitioner, Respondent

Director Compliance (DIN Status)	MCA Probe → Directors	Column: STATUS (Active / Disqualified / Resigned); cross-ref Director - Association History — appointment/cessation pattern
Working Capital Gap (Quick Ratio)	MCA Probe → Standalone Financial Data	RATIOS — Quick Ratio; Peer Comparison — Quick Ratio Median for benchmark
Receivable Fraud Risk (Overdue Debtors)	MCA Probe → Auditors' Comments-Standalone	Comments on trade receivables exceeding six months; Annexure - Financial Params — Trade receivables exceeding six months
Industry Benchmark (EBITDA Margin)	MCA Probe → Peer Comparison	Column: EBITDA Margin (%) vs. Median of # of Peers

Revenue Growth vs Industry	MCA Probe → Peer Comparison	Column: Revenue growth vs. Peer Median; Financial Year comparison rows
ROE vs Peers	MCA Probe → Peer Comparison	Column: Return on Equity (%) vs. Median of peer set
Director Network Contagion Risk	MCA Probe → Other Directorships	Columns: Corporate Name, Sum Of Charges, CIN; cross-ref Director - Association History for repeated appointments to stressed entities
Related Party Ownership Concentration	MCA Probe → Shareholding More Than 5%	PROMOTERS section — Shareholding %; cross-ref About the Company — AS-18 RP transaction gross value
MSME Payment Discipline	MCA Probe → MSME Supplier Payment Delays	All rows: Supplier Name, PAN, Total Amount Due,

		Amount Due, Period (month-by-month)
Debtors-to-Sales Ratio (DSO)	MCA Probe → Standalone Financial Data	RATIOS — Debtors/Sales Days; Peer Comparison — Debtors/Sales Days Median
Payables-to-Sales Ratio (DPO)	MCA Probe → Standalone Financial Data	RATIOS — Payables/Sales Days; Peer Comparison — Payables/Sales Days Median
EPFO Employee Strength	MCA Probe → EPFO Establishments	Columns: Establishment Name, Number of Employees, Latest Date of Credit, Wage Month
Securities Allotment Events	MCA Probe → Securities Allotment	All allotment events: Date, Amount, Category

Related Corporates	MCA Probe → Related Corporates	All related entity names, CINs, relationship type
Annexure - Contact Details	MCA Probe → Annexure - Contact Details	Email, Phone, Address for company contacts

B.7 Bank Statement Analysis (Sheets)

The data from accounts provided will be clubbed from individual BSA analysis data from the following sheets. Format of output(Reference:https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account)

-Account Details
-CAM Analysis
-All Transactions
-CAM Analysis
-Fraud and Risk Triggers
-Irregular Transactions

B.7 Peer Benchmarking — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Column in Source
Financial Year	MCA Probe → Peer Comparison	Column: Financial Year
No. of Peers in Sample	MCA Probe → Peer Comparison	Column: # of Peers in Sample
Revenue (Rs)	MCA Probe → Peer Comparison	Metric: Revenue — Company value and Peer median (Comparative Metrics columns)
Revenue Growth (%)	MCA Probe → Peer Comparison	Row/Metric: Revenue Growth (%) — Company vs. Peer median
EBITDA Margin (%)	MCA Probe → Peer Comparison	Row/Metric: EBITDA Margin (%) — Company vs. Peer median

Net Margin (%)	MCA Probe → Peer Comparison	Row/Metric: Net Margin (%) — Company vs. Peer median
Return on Equity (%)	MCA Probe → Peer Comparison	Row/Metric: Return on Equity (%) — Company vs. Peer median
Debt / Equity	MCA Probe → Peer Comparison	Row/Metric: Debt / Equity — Company vs. Peer median
Inventory / Sales (Days)	MCA Probe → Peer Comparison	Row/Metric: Inventory / Sales (Days) — Company vs. Peer median
Debtors / Sales (Days)	MCA Probe → Peer Comparison	Row/Metric: Debtors / Sales (Days) — Company vs. Peer median

Payables / Sales (Days)	MCA Probe → Peer Comparison	Row/Metric: Payables / Sales (Days) — Company vs. Peer median
Cash Conversion Cycle (Days)	MCA Probe → Peer Comparison	Row/Metric: Cash Conversion Cycle (Days) — Company vs. Peer median
Sales / Net Fixed Assets	MCA Probe → Peer Comparison	Row/Metric: Sales / Net Fixed Assets — Company vs. Peer median
Peer Company Names	MCA Probe → Peer Comparison	Columns: 5 Closest Peers by Revenue — Legal Name, City, Revenue (Rs)
Per-Peer Metrics (COMPARATIVE METRICS 1–15)	MCA Probe → Peer Comparison	Columns: COMPARATIVE METRICS 1 through COMPARATIVE METRICS 15 — Segment, Metrics row per peer

B.8 Auditors Details — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Column in Source
Year	MCA Probe → Auditors' Comments-Standalone	Column: Year (financial year of audit)
Auditor's Name	MCA Probe → Auditors' Comments-Standalone	Column: Auditor Name
Type (Standalone / Consolidated)	MCA Probe → Auditors' Comments-Standalone	Column: Section — value is STANDALONE or CONSOLIDATED
Auditor's Membership No.	MCA Probe → Auditors' Comments-Standalone	Column: Auditor Membership Number
Adverse Comments (Yes / No)	MCA Probe → Auditors' Comments-Standalone	Column: Whether Auditors' Report has been Qualified or has any Reservations or

		Contains Adverse Remarks
Auditor’s Firm Name	MCA Probe → Auditors’ Comments-Standalone	Column: Auditor Firm Name
Firm’s Registration No.	MCA Probe → Auditors’ Comments-Standalone	Column: Firm Registration Number
PAN (of firm or auditor)	MCA Probe → Auditors’ Comments-Standalone	Column: PAN (of firm or auditor)
Address (of firm or auditor)	MCA Probe → Auditors’ Comments-Standalone	Column: Address (of firm or auditor)
Comment Text	MCA Probe → Auditors’ Comments-Standalone	Column: Comments Given By; Section Name; Footnotes — full text of auditor remarks

Auditor’s Name (cross-ref)	MCA Probe → Peer Comparison	Column: Auditor Name (appears in Peer Comparison section for latest year)

B.9 GST Returns — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Column in Source
GSTIN	IDfy GST Analysis → Account Details	Row: GSTIN
PAN	IDfy GST Analysis → Account Details	Row: PAN
Analysis Period (From / To)	IDfy GST Analysis → Account Details	Rows: Period From, Period To

State of Operations	IDfy GST Analysis → Account Details	Row: State of Operations (based on max. gross sales)
GSTR 1 Monthly Availability	IDfy GST Analysis → Data Status	Columns: GSTIN, Return Period (monthly), GSTR 1 row — Data Available / Data Unavailable per month
GSTR 2A Monthly Availability	IDfy GST Analysis → Data Status	Columns: GSTIN, Return Period (monthly), GSTR 2A row — Data Available / Data Unavailable per month
GSTR 3B Monthly Availability	IDfy GST Analysis → Data Status	Columns: GSTIN, Return Period (monthly), GSTR 3B row — Data Available / Data Unavailable per month

Total Value of Sales (A)	IDfy GST Analysis → Overview	GSTR 1 section — Row: Total Value of Sales (A)
Total Value of Debit Notes Issued (B)	IDfy GST Analysis → Overview	GSTR 1 section — Row: Total Value of Debit Notes Issued (B)
Total Value of Credit Notes Issued (C)	IDfy GST Analysis → Overview	GSTR 1 section — Row: Total Value of Credit Notes Issued (C)
Adjustments due to Amendments (D)	IDfy GST Analysis → Overview	GSTR 1 section — Row: Adjustments due to Amendments (D)
Gross Sales (E = A+B−C+D)	IDfy GST Analysis → Overview	GSTR 1 section — Row: Gross Sales (E=A+B-C+D)
Total Value of Purchases (F)	IDfy GST Analysis → Overview	GSTR 2A section — Row: Total Value of Purchases (F)

Total Value of Debit Notes Issued (G)	IDfy GST Analysis → Overview	GSTR 2A section — Row: Total Value of Debit Notes Issued (G)
Total Value of Credit Notes Issued (H)	IDfy GST Analysis → Overview	GSTR 2A section — Row: Total Value of Credit Notes Issued (H)
Adjustments due to Amendments (I)	IDfy GST Analysis → Overview	GSTR 2A section — Row: Adjustments due to Amendments (I)
Gross Purchases (J = F−G+H+I)	IDfy GST Analysis → Overview	GSTR 2A section — Row: Gross Purchases (J=F-G+H+I)
Gross Profit (K = E−J)	IDfy GST Analysis → Overview	Row: Gross Profit (K=E-J)
Total GST Liability (L)	IDfy GST Analysis → Overview	Row: Total GST Liability (L)

Input Tax Credit Available (M)	IDfy GST Analysis → Overview	Row: Input Tax Credit Available (M)
Profit after GST (N = K−L+M)	IDfy GST Analysis → Overview	Row: Profit after GST (N=K-L+M)
B2B Sales	IDfy GST Analysis → Overview	Business Breakup section — B2B (Business to Business) — Sales
B2CL Sales	IDfy GST Analysis → Overview	Business Breakup section — B2CL (Business to Customers Large)
B2CS Sales	IDfy GST Analysis → Overview	Business Breakup section — B2CS (Business to Customers Small)
CDNR (Credit/Debit Notes — Registered)	IDfy GST Analysis → Overview	Business Breakup section — CDNR (Credit and Debit Notes Registered)

CDNUR (Credit/Debit Notes — Unregistered)	IDfy GST Analysis → Overview	Business Breakup section — CDNUR (Credit and Debit Notes Un-Registered)
Exports	IDfy GST Analysis → Overview	Business Breakup section — Exports
NIL / Exempted / Non-GST	IDfy GST Analysis → Overview	Business Breakup section — NIL (NIL/Exempted/Non-GST)
B2B Purchases	IDfy GST Analysis → Overview	Business Breakup section — B2B (Business to Business) — Purchases
Import Purchases	IDfy GST Analysis → Overview	Business Breakup section — Imports (IMPG + IMPSEZ)

Reverse Charge Purchases	IDfy GST Analysis → Overview	Business Breakup section — Reverse Charge
GSTR 3B Outward Supply — As per GSTR 1 vs 3B	IDfy GST Analysis → Overview	Comparison with GSTR 3B section — Total Outward Supply: As per GSTR 1, As per GSTR 3B, % Variation
GSTR 3B Export Value — As per GSTR 1 vs 3B	IDfy GST Analysis → Overview	Comparison with GSTR 3B section — Export Value: As per GSTR 1, As per GSTR 3B, % Variation
GSTR 3B NIL/Exempted — As per GSTR 1 vs 3B	IDfy GST Analysis → Overview	Comparison with GSTR 3B section — NIL/Exempted/Non-Gst: As per GSTR 1, As per GSTR 3B, % Variation
GSTR 3B ITC — As per GSTR 2A vs 3B	IDfy GST Analysis → Overview	Comparison with GSTR 3B section — Input Tax

		Credit: As per GSTR 2A, As per GSTR 3B, % Variation
Monthly Sales (Taxable Value + Tax)	IDfy GST Analysis → Monthly Sales and Purchase	Monthly Sales Summary — Month, Taxable Value, Tax (per month row)
Monthly Purchases (Taxable Value + Tax)	IDfy GST Analysis → Monthly Sales and Purchase	Monthly Purchases Summary — Month, Taxable Value, Tax (per month row)
HSN Code	IDfy GST Analysis → HSN Summary	Column: Code
HSN Description	IDfy GST Analysis → HSN Summary	Column: Description
HSN Quantity	IDfy GST Analysis → HSN Summary	Columns: Unit, Quantity

HSN Taxable Value + Share	IDfy GST Analysis → HSN Summary	Columns: Taxable Value, % in Taxable Value
HSN Tax Rate	IDfy GST Analysis → HSN Summary	Column: Tax Rate charged
Average Sales per Month	IDfy GST Analysis → Summary	Averages section — Row: Average Sales per Month
Average Sales per Customer	IDfy GST Analysis → Summary	Averages section — Row: Average Sales per Customer
Average Purchases per Month	IDfy GST Analysis → Summary	Averages section — Row: Average Purchases per Month
Average Purchases per Supplier	IDfy GST Analysis → Summary	Averages section — Row: Average Purchases per Supplier

Nature of Suppliers/Customers (Registered %)	IDfy GST Analysis → Summary	Nature of suppliers and customers section — Registered, Unregistered proportions for both Customers and Suppliers
Document Count (Invoices, Credit/Debit Notes)	IDfy GST Analysis → Summary	Doc Name section — Invoice for outward supply, Revised Invoice, Debit Note — Total Issued, Cancelled, Net Issued

B.10 Major Suppliers and Buyers — Data Source Mapping

CAM Field	Source Document → Sheet	Field / Column in Source

Supplier Name (Top 10)	IDfy GST Analysis → Major Suppliers & Customers	10 Major Suppliers section — Column: Name of Supplier
Supplier — No. of Invoices	IDfy GST Analysis → Major Suppliers & Customers	10 Major Suppliers section — Column: Total No. of invoices
Supplier — Total Taxable Amount	IDfy GST Analysis → Major Suppliers & Customers	10 Major Suppliers section — Column: Total Taxable Amount (ranked by value)
Customer Name (Top 10)	IDfy GST Analysis → Major Suppliers & Customers	10 Major Customers section — Column: Name of Customer
Customer — No. of Invoices	IDfy GST Analysis → Major Suppliers & Customers	10 Major Customers section — Column: Total No. of invoices

Customer — Total Taxable Amount	IDfy GST Analysis → Major Suppliers & Customers	10 Major Customers section — Column: Total Taxable Amount (ranked by value)
Supplier Regularity	IDfy GST Analysis → Supplier Summary	Column: Regular/Irregular — classification based on filing pattern
Supplier Filing Status	IDfy GST Analysis → Supplier Summary	Column: Filing Status (Filed/Invoices Raised) — ratio of filed returns to invoices raised
Supplier Tax + Taxable Value	IDfy GST Analysis → Supplier Summary	Columns: Tax, Total Taxable Value, Proportion in Total Supply Value
State-wise Supplier Distribution	IDfy GST Analysis → Supplier Summary	State-wise Supplier Frequency section — State, Frequency, Tax, Taxable Value

Customer Regularity	IDfy GST Analysis → Customer Summary	Column: Regular/Irregular — classification based on filing pattern
Customer Filing Status	IDfy GST Analysis → Customer Summary	Column: Filing Status (Filed/Invoices Raised) — ratio of filed returns to invoices raised
Customer Tax + Taxable Value	IDfy GST Analysis → Customer Summary	Columns: Tax, Total Taxable Value, Proportion in Total Supply Value
State-wise Customer Distribution	IDfy GST Analysis → Customer Summary	State-wise Customer Frequency section — State, Frequency, Tax, Taxable Value, Registered/Unregistered split

Common Suppliers/Customers (Related-Party Flag)	IDfy GST Analysis → Common Customers and Suppliers	Columns: Name, Purchase Value, Supply Value — entities appearing in both supplier and customer lists

B.8 Cross-Source Triangulation — Field Pairing Reference

The following table maps each triangulation check to the exact pair of source fields being compared. Developers must ensure both values are extracted before the triangulation engine runs.

(The value populated in each column will be a numerical value in Rupee, except for "Total Borrowings")

(In case multiple documents of bank statements are received, the BSA value will be sum of individual bank statements values)

Triangulation Check	**ITR Source Field and Rationale *(if applicable)***	**GST Source Field and Rationale *(if applicable)***	**MCA Source Field and Rationale *(if applicable)***	**Bank Statement Value**

Revenue from operations	ITR: P&L Sl. 5 (Revenue from Ops)	GST: Overview → GSTR 1 taxable outward	MCA: Standalone P&L → Revenue	BSA: Revenue calculation logic. (if multi account, take sum value) -If BSA statement period <12 months (eg: 8 months) Revenue - ((Revenue (8 months) * 8))/12 -If BSA statement period of >12 months (Take revenue calculation of

				recent 12 months)

Vendor Authenticity	ITR : NA	GST :GSTR-2B B2B Inward Supplies — Supplier GSTIN vs GSTR-1 Buyer list cross-match (This is readily available as a vendor api output, match the top buyer entity with top seller entity for the first 3 suppliers/ buyers) (Ex: If an entity is detected as top supplier (rank 1), and	MCA : NA	N.A (GST value taken is taxable value and BSA value taken is actual sales, they cannot be directly compared)

		that same entity is detected as top buyer (rank1-3), this check would still be flagged -If detected the value that should be populated here is the (Taxable value (supplier amount) - Taxable value (customer amount))		
Other Income/ Unidentified Inflows	ITR: P&L Sl. 4 (Other	N.A	MCA Standalone Financial Data	Sum of Non Trade Credit amount

	operating income)		| Other Income line	
Employee Expenses/ Salary	ITR: P&L Sl. 10 + Sl. 17 (Direct Wages + Employee Benefit Expenses)	N.A	MCA Standalone Financial Data | Employee Benefit Expenses	Sum of (Employee expenses and reimbursements debits)
Raw material purchase cost	ITR: P&L Sheet | Sl. No. 8 — Purchases	GST ReturnsSections Business Breakup → Purchases → B2B	MCA Standalone Financial Data | Cost of Materials + Purchases of Stock in trade	N.A (Not possible to correctly identify what aspect of vendor bill payment is to an organisation for raw

				material purchase itself)
Utility Expense Audit	ITR:P&L Sheet | Sl. No. 16 Power and Fuel	N.A	MCA: Standalone Financial Data— Other Expenses Power & Fuel line	BSA: Sum of utility bill payments
Inventory	ITR: Balance Sheet | Sl. No. 47- Inventories	N.A	MCA: Standalone Financial Data— Inventories	N.A
Bank Balances	ITR: Balance Sheet | Sl. No. 49	N.A	MCA: Standalone Financial Data— Cash	Bank Balance at the end of statement period

	Cash and Cash Equivalents		and Cash Equivalents	
Investments (FD/Financial Assets)	ITR-:Balance Sheet | Sl. No. 40 — Non-Current InvestmentsSl. No. 46 — Current Investments (Sum of both)	N.A	MCA: Standalone Financial Data— Investments (Non-current + Current)	Bulk Investment (sum)

Loan and advances given	ITR-Balance Sheet | Sl. No. 43 Long Term Loans and Advances Sl. No. 50 — Short Term Loans & Advances (Sum of both)	N.A	MCA: Standalone Financial Data— Long Term Loans and Advances Short Term Loans & Advances (Sum of both)	N.A
Total Borrowings	ITR-Balance sheet | Total Non current liabilities	N.A	MCA: Standalone Financial Data— Total Non Current Liabilities	There will only be 2 values here Total Detected EMI Amount (EMI + Probable EMI) : Sum

				(Loan/EMI Payment Debits) Else value will be 0, if no obligations detected
Trade Payables	ITR: Balance Sheet | Sl. No. 14 -Trade Payables (>6 Months) Sl. No. 25 — Trade Payables (<6 Months) (Take sum of both)	N.A	MCA: Standalone Financial Data— Trade Payables	N.A

Vendor Payment Scan	ITR: P&L Sheet | Sl. No. 20 Other Expenses	N.A	MCA: Standalone Financial Data— Other Expenses	Sum of vendor bill payments. (This sum value is to be displayed) Calculate if the top receiver entity detected is any related related party with fuzzy match logic (Check “Related Corporate” → “Corporate Name” in MCA JSON) If it this, this needs to be passed to AI orchestration layer to

				highlight in AI inference
Undisclosed Capital Inflows	N.A	N.A	N.A	BSA - Non trade credits from entities not mentioned in director list in MCA.

Related Party Disclosure	ITR: Balance sheet | Short term liabilities from RP + long term liabilities from RP	N.A	N.A	There will only be 2 values here Total Detected EMI Amount (EMI + Probable EMI) : Sum (Loan/EMI Payment Debits) (Using fuzzy match check if the receiver is a related corporate from MCA, if so only then send this value to AI) Else value will be 0, if no emi payments detected being

				sent to related corporates
Auditor Fee Traceability	N.A	N.A	MCA: Standalone Financial Data—Payment to Auditors	BSA: Search narration for auditor firm name debit Auditor Name and Firm found in Auditor(s) details in Standalone Financial Data

The following sheets will be populated from existing NetScan Output.

-Court and AML - For main and related entities

-Labour Stats - This is EPFO Filing data which is currently unavailable from EPFO, so this sheet will not be populated in V1

-Network Overview

10. Success Metrics & Acceptance Criteria

10.1 Product KPIs

Metric	Target (v1.0 Launch)

Time to complete full CAM	< 60 minutes
Document parsing accuracy (ITR fields)	> 97%
Document parsing accuracy (GST fields)	> 97%
BSA transaction categorisation accuracy	> 90%
False positive rate (flags raised incorrectly)	< 10%
False negative rate (real flags missed)	< 5%

10.2 Acceptance Criteria for v1.0 Launch

1. ITR max file size - 20MB, Bank Statement max file size - 50MB (configured in TIP)
2. If a partnership firm is given for analysis and the client wants just GST-BSA analysis, the “Company Information” sheet should populate the following details from GST and Bank Statement
   -Company Name
   -GSTIN
   -PAN

-Account holder name (Bank Statement)
-Address (Bank Statement)

3. If bank statement provided is of <12 months or >12 months- Calculation to be adjusted as per logic mentioned in Triangulation BSA value column.
4. **All 4 triangulation options need to be tested (ITR-GST-MCA-BSA). BSA will be fixed in each triangulation and cannot be opted out.**
   Eg: A client can choose ITR-BSA (Only, ITR and BSA details related sheets (data available in those sheets can only be fetched with ITR and BSA and rest of the values will be populated but mentioned as N/A) . GST and MCA related sheets will be shown in excel with one statement "GST/MCA data not provided". In Triangulation sheet, the GST/MCA column will be shown as N.A
5. Successfully extract all JSON fields with < 2% field error rate on a test set.
6. All document related parameters are correctly extracted and stored against the particular case, Company related information like Company Name, Business Type/Activity detected from MCA needs to be stored against each ITR/MCA/BSA/MCA value extracted for that company.
7. The deviation related to each combination of documents needs to be stored against company related information.
8. The Risk Signal sheet will have 3 exhaustive statuses
   -Yes: If detected and all preliminary info needed to detect it is present
   -No : If not detected and all preliminary info needed to detect it is present
   -Data Insufficient :all preliminary info needed to detect it is not present
9. The excel is generated within 60 minutes in the exact order of sheets as aligned in https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account
10. All values populated to be in Rupees. The MCA data will be in Cr and is populated as "0.3", this needs to be displayed as "30,00,000" in excel (Only for triangulation sheet). Rest of the sheets we mention that the value is in crores and print value as it is.
11. In case any value or data is unavailable to compute a risk signal entirely (In ratios, parameters) it should be treated as N/A instead of 0. The risk signal status should be "Data Insufficient"
12. **-Labour Stats - This is EPFO Filing data which is currently unavailable from EPFO, so this sheet will not be populated in V1** scope. All EPFO related data in any sheets will not be populated in V1 scope and if utilised in Risk Signals sheet will show the status as 'Data Insufficient"

13. If any document provided is not of the same period as of Bank Statement, a note needs to be provided in the ITR and MCA analysis sheet stating the same. As referenced in https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account
14. If all documents/credentials related to the selected triangulation check are not provided and error message mentioning the missed out details should be added.
15. **The current V1 scope will only have the sheets mentioned in** https://docs.google.com/spreadsheets/d/1qB0WqMj3YOCWWaD9yrk5UkeGJYvYcHHULq0U9czZXx4/edit?gid=1658835350#gid=1658835350Connect your Google account **.**
16. **Bank statement analysis as an option cannot be deselected from UX, it's a part of all triangulations**

11. Assumptions

- Borrowers submit original, unmodified documents directly from government portals
- GST details fetched by the vendor are of current updated data across all eligible forms to be filed by the business. If GST data is unavailable, we assume business has not filed it.
- If MCA data is unavailable, we assume business has not filed its financial statements
- Bank statements are provided for the primary operating account — multiple undisclosed accounts remain a residual risk
- All monetary amounts are in INR — foreign-currency entities require additional configuration, which is not in scope currently.

12. Testing Layers

- Unit Tests — individual parser and extraction functions for ITR, GST, MCA, BSA fields
- Integration Tests — end-to-end data flow from document ingestion → storage → AI inference → CAM generation
- Signal Accuracy Tests — validation that each of the 54 risk checks fires on the correct inputs and stays silent on clean inputs
- Triangulation Tests — cross-source deviation calculations for all document pairs
- UI / UX Tests — case creation, upload, dashboard, CAM viewer, export flows
- Performance Tests — latency, throughput, and concurrency under load

- Regression Tests — full suite run before every release candidate

13. Input required and validations

Service	Input	Validations
Input screen	1.Company Name 2.CIN 3.PAN 4.Triangulation selection (Dynamic)	1. Text value 2. Exactly 21 characters 3. Exactly 10 characters ; Exactly 10 characters. Pattern: `[A-Z]{5}[0-9]{4}[A-Z]{1}`. Must be uppercase. Example: `AAFCG5401M`. Throw error if checksum fails basic structural check. 4. Bank statement selection to be kept as default, rest can be selected and deselected.

ITR	1.PDF Upload 2.Credentials	1.Max size 50MB (all uploaded PDF's) 2.All mandatory credentials to be added (mentioned in design with *)
